JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
208	NT erdők felújítása de minimis	National Support - Reforestation de minimis support	The aim of the measure is to preserve the area (quantity), the environmental balance and health (quality) of forests by supporting the artificial and natural reforestation.
370	Pénzügyi fejelem visszatérítése	Reimbursement of financial discipline	The amount subtracted in the course of the adjustment applied in connection with the financial discipline and that was not used by the European Union and is approved for the member state, the member state can reimburse the amount until the 15th of October following the claim year for those clients who received financial discipline in the given financial year.
193	Rendezett piaci kapcsolatok kialakítása érdekében nyújtott támogatás	Support for the establishment of organized market relations	The measure aims to promote the spread of contract-based market relations in the agricultural sector of production of animal products.
381	Rizstermesztés támogatás igénylése	Voluntary coupled scheme for rice	The aim of the measure to support rice producer in order to maintain the production. Eligibility conditions: the claimant is, for the given claim year, entitled to SAPS support for an area at least 1 hectare; condition must be fulfilled at latest by 31 May
102	Sajt magántárolás támogatása	Private storage of cheese	Granting of aid for the storage of products by private operators.
571	Sertés állatjóléti csekély összegű támogatás	De minimis support for swine animal welfare	The aim of the measure is to compensate the covenants of animal welfare in the course of swine farming beyond regulations.
219	Sertés állatjóléti támogatás	Swine animal welfare support	The aim of the measure is to compensate the covenants of animal welfare in the course of swine farming beyond regulations.
375	Szálas fehérjenövény támogatás igénylése	Voluntary coupled support for protein crops	Protein fodder crops (lucerne, clover, sainfoin, cereal-legume mixtures and their seeds) accounted for 173 thousand hectares in Hungary during the period 2009-2012, covering 3 per cent of the total utilised agricultural area. The growing area of protein fodders showed substantial changes from year to year. The aim of the measure is to make the sector a bit profitable compare to other sectors and stop the decline. General eligibility conditions: The claimant is, for the given claim year, entitled to SAPS support for an area at least 1 hectare and cultivates certain plants listed in national regulation; use of certified propagule - both for species and varieties for new plantation or oversowing - with verified origin in a certain quantity; as a derogation from the above condition no certified propagule is required for the initial sowing of multiannual crops taken place before the first year of the application of this scheme; in the case of a mixture (in case of secondary crops as well), protein crops must have a verified rate of over 50 percent; in the case of stands older than one year (with the exception of plants sown in autumn) one reaping is compulsory in the first year and two thereafter; if the stand is older than one year in the claim year, than it has to be reaped twice; in case of multiannual crops minimum 80% plant covering (crop stand uniformity) has to be maintained.
587	Száritmány-előállítók által igénybe vehető költségtámogatás	De minimis support for processors of dried products	Support the heating costs for production of artificially air-dried vegetables, fruits, herbs, spices and crops.
317	Száritott takarmány de minimis támogatás	De Minimis Payment for Dried Fodder	To preserve the produce of dried fodder in Hungary. The holder of the support is that plant producing dried fodder which had the approval of the extinct (from the day 31. March 2012.) measure of support for dried fodder in the 2009/2010, 2010/2011 and 2011/2012 base period of economic years. Further condition is that the plant producing dried fodder shall produce dried fodder in either economic year of the base period and shall use at least half the amount of fuel used for producing fodder for producing dried fodder in the current year in the average of base period.
84	Szarvasmarha tartás extenzifikációs támogatása - elválasztott	Cattle extensification premium - decoupled scheme	The aim of the measure is to support those cattle farmers who keep cattles in their farms in an extensive way. This revenue complementary support helps the dynamic improvement of the beef cattle sector and the modernization of producing technologies and effective farming. It improves the conditions for successful farming of beef cattle producers. This directly paid support ensures the proper standard of living of employees working in beef cattle sector and the stabilization of the market of beef (meat).
376	Szemes fehérjenövény támogatás igénylése	Voluntary coupled support for soybean and protein crops	The total area of soybeans and protein crops (peas, beans and sweet lupine) decreased by 3 per cent to less than 63 thousand hectares between 2010 and 2012. The average per hectare yield of protein grains was 1.6 tonnes per hectare in the period 2009-2012, which was 35 per cent lower than the yield in the main producing Member States of the EU. The per hectare yields of these crops have also been quite volatile due to the generally low level of cultivation knowledge in Hungary. Per hectare yields in the sector, in comparison to the leading producers in the EU, are low, which is disadvantageous with respect to the profitability of the sector. Therefore the aim of the measure to stabilize the yield and maintain the profitability. General eligibility conditions: The claimant is, for the given claim year, entitled to SAPS support for an area at least 1 hectare and cultivates certain plants listed in national regulation; with the exception of field pea use of certified seed with verified origin in a quantity as required in national regulation; minimum yield: 1 ton per hectare: soybean, horse bean, sweet lupine; 2 tons per hectare: peas.
23	Szőlőültetvények szerkezet-átalakításának és átállításának támogatása	Aid for the restructuring and conversion of vineyards	The aim of the measure is to help suite the relations of the demand and supply of the wine and grape production sector, to promote the modernization of vineyards, and the improvement of the competitiveness of the producers. Restructuring and conversion of vineyards can be the changing to different varieties and relocating of plantations. The holder of the support is the natural person or economic operator who/which is the user of the plantation favoured in the restructuring and who/which has individual plan approved by ARDA.
545	Tanyafejlesztés 2. § (2) bekezdés	Village Renewal - paragraph 2. (2)	The purpose of the measure is to preserve and improve farmsteads and settlements, and to provide access to electricity services for the buildings used for residential purposes of farmsteads without public electricity network connection or off-grid power generation equipment (electricity producing equipments of power output up to 3,5 kW, individual development of the internal consumer network equipments).
356	Tanyafejlesztés 2. § (2) bekezdés a) pont mezőgazdasági de minimis	Village Renewal - paragraph 2. (2) a) agricultural de minimis	The purpose of the measure is to preserve and improve farmsteads and settlements, and to provide access to electricity services for the buildings used for residential purposes of farmsteads without public electricity network connection or off-grid power generation equipment (electricity producing equipments of power output up to 3,5 kW, individual development of the internal consumer network equipments).

JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
510	VP-M01.1.1-Képzés	RDP-M01.1.1 Trainings	The aim of the call is to provide agricultural operators with opportunities to acquire knowledge in a variety of forms and formats to meet their needs through participation in vocational training. The call aims to develop the human background of the agricultural sector, which contributes to the economic growth of rural areas, to the promotion of sustainable, environmentally friendly, resource-efficient and competitive farming of farmers, food processors and foresters, and to the resilience of rural areas. The competitiveness of producers is fundamentally determined by the quality of the existing level of knowledge, ie its modernity, applicability and depth. The knowledge passed on to the participants in vocational training also has a positive effect on the consumer side, as the new additional knowledge increases the quality of production and service as a direct effect.
476	VP-M01.2.2-Tájékoztatói szolgáltatás	RDP-M01.2.2-Information actions	Providing support for farmers, foresters, food processing companies and SMEs in rural areas economic operators, as well as for the participants of Thematic sub-program of the Young Farmer or Thematic sub-program of Short Supply Chains to <ul style="list-style-type: none"> • enhance their competitiveness, • increase their resource efficiency • improve their environmental performance • successful adaptation to the effects of climate change, • to join quality systems and certification systems • improve their cooperation skills necessary to increase the knowledge base and to increase knowledge transfer, so to sustain the rural economy
540	VP-M02.1.1-Egyéni szaktanácsadás	RDP-M02.1.1 Advisory services for individuals	The aim of this Call is to provide agricultural, forestry and food business operators, as indirect beneficiaries, with the appropriate professional assistance to promote effective knowledge transfer and innovation, as well as to increase the economic competitiveness of the target groups covered by the Rural Development Program, with respect of sustainability, taking into account the environmental and climate protection, and resource efficiency.
541	VP-M02.1.2-Csoportos szaktanácsadás	VP-M02.1.2 Advisory services for groups	The aim of this Call is to provide agricultural, forestry and food business operators, as indirect beneficiaries, with the appropriate professional assistance to promote effective knowledge transfer and innovation, as well as to increase the economic competitiveness of the target groups covered by the Rural Development Program, with respect of sustainability, taking into account the environmental and climate protection, and resource efficiency.
614	VP-M03.1.1-Minőségrendszerekhez történő csatlakozás	VP-M03.1.1 Join to official quality schemes	The aim of the support is to strengthen the integration of producers into the food chain and to make the quality systems recognized by the European Union and Hungary and their products known and recognized by the markets and consumers. A further aim of the call is to encourage the participation of farmers in higher quality and value-added agricultural products and food quality schemes.
467	VP-M04 Állattartó telepek korszerűsítése (ÚMVP)	RDP-M04 Modernization of animal husbandry farms	The aim of the support is to modernize livestock farms in order to make them correspond to the regulations connecting to the emplacement of animal manures, to improve the standard of feeding and technical level of livestock farms, the situation of food safety and animal health, the infrastructure and the work condition and the effectiveness of people working in livestock farms. Support can be requisited in target areas according to the 3. § article (1) a)-e) 27/2007. Regulation FVM relating to the client's one or more already existing livestock farms.
436	VP-M04 Mg. termékek értéknövelése (ÚMVP)	RDP-M04 Adding value to agricultural products and resource efficiency in processing	The objectives of this support are to increase the overall performance and competitiveness of the farm and food business, to improve food safety and hygiene conditions and to reduce environmental impact through the improvement of processing and distributing agricultural products or through the introduction of new products, processes or technologies.
425	VP-M04 Nem termelő beruházási támogatások (ÚMVP)	RDP-M04 Support for non-productive investments	The main objective of the measure is to conserve the rural landscape, to promote the sustenance of the individual value of the landscape, increase of the richness in species of the fauna and flora, an improvement of the environment's condition, facilitation of the fulfilment of the commitments made on a voluntary basis and increase in public welfare in the areas of high natural value, specified in Natura 2000 and in the programme.
448	VP-M04.1.1.1-Állattenyésztés-állattartó telepek	RDP-M04.1.1.1- Modernization of animal farms	The purpose of the Call is to increase the competitiveness of livestock farms. There is an opportunity for livestock farming and for the handling and storage of the product produced. It is also to create, construct and implement of non-construction projects through the procurement of equipment and machinery for animal husbandry. Improvement of resource efficiency in animal husbandry, among other things, results in a reduction in specific energy consumption, and therefore, in particular, this Call builds on all investment in animal keeping facilities that results energy efficiency. Accordingly, building renovation, modernization of livestock farms' facilities and renewable energy technologies will also be supported. Another important objective is to strengthen and develop the farms of young farmers.
449	VP-M04.1.1.2-Állattenyésztés-baromfi	RDP-M04.1.1.2- Modernization of animal farms ? poultry farming	The purpose of the Call is to increase the competitiveness of livestock farms. There is an opportunity for livestock farming and for the handling and storage of the product produced. It is also to create, construct and implement of non-construction projects through the procurement of equipment and machinery for animal husbandry. Improvement of resource efficiency in animal husbandry, among other things, results in a reduction in specific energy consumption, and therefore, in particular, this Call builds on all investment in animal keeping facilities that results energy efficiency. Accordingly, building renovation, modernization of livestock farms' facilities and renewable energy technologies will also be supported. Another important objective is to strengthen and develop the farms of young farmers.

452	VP-M04.1.1.3-Állattenyésztés-szarvasmarha	RDP-M04.1.1.3- Modernization of animal farms ? cattle farming	The purpose of the Call is to increase the competitiveness of livestock farms. There is an opportunity for livestock farming and for the handling and storage of the product produced. It is also to create, construct and implement of non-construction projects through the procurement of equipment and machinery for animal husbandry. Improvement of resource efficiency in animal husbandry, among other things, results in a reduction in specific energy consumption, and therefore, in particular, this Call builds on all investment in animal keeping facilities that results energy efficiency. Accordingly, building renovation, modernization of livestock farms' facilities and renewable energy technologies will also be supported. Another important objective is to strengthen and develop the farms of young farmers.
450	VP-M04.1.1.4-Állattenyésztés-juh és kecske	RDP-M04.1.1.4- Modernization of animal farms ? sheep and goat farming	The purpose of the Call is to increase the competitiveness of livestock farms. There is an opportunity for livestock farming and for the handling and storage of the product produced. It is also to create, construct and implement of non-construction projects through the procurement of equipment and machinery for animal husbandry. Improvement of resource efficiency in animal husbandry, among other things, results in a reduction in specific energy consumption, and therefore, in particular, this Call builds on all investment in animal keeping facilities that results energy efficiency. Accordingly, building renovation, modernization of livestock farms' facilities and renewable energy technologies will also be supported. Another important objective is to strengthen and develop the farms of young farmers.
451	VP-M04.1.1.5-Állattenyésztés-sertés	RDP-M04.1.1.5- Modernization of animal farms ? pig farming	The purpose of the Call is to increase the competitiveness of livestock farms. There is an opportunity for livestock farming and for the handling and storage of the product produced. It is also to create, construct and implement of non-construction projects through the procurement of equipment and machinery for animal husbandry. Improvement of resource efficiency in animal husbandry, among other things, results in a reduction in specific energy consumption, and therefore, in particular, this Call builds on all investment in animal keeping facilities that results energy efficiency. Accordingly, building renovation, modernization of livestock farms' facilities and renewable energy technologies will also be supported. Another important objective is to strengthen and develop the farms of young farmers.
392	VP-M04.1.1.6-Állattenyésztés-trágyatárolók	RDP-5-4.1.1.6-15 ? Modernization of animal farms? manure storages	The aim of the measure is to support the construction of covered manure storage complying with environmental protection requirements and reduction of greenhouse gas emissions. Solving the problem of manure settlement can also contribute to the reduction of point-to-point nitrate pollution from agricultural sources, thereby improving the quality of groundwater and coordinating nutrient cycle processes and agrotechnical needs.
618	VP-M04.1.1.7-Járványvédelmi rendszerek fejlesztése-Baromfi és sertés	RDP-M04.1.1.7 Development of disease control systems-Poultry and pigs	The risk of the emergence of various epidemic animal diseases in livestock farms can be reduced by using a number of technologies, and the basic aim of the Call is to facilitate their acquisition and development. The Call offers support to the pig and poultry sector, which is most affected by epidemiological risks and can be most effectively protected by development.
669	VP-M04.1.1.8-Állattartó telepek fejlesztése	RDP-M04.1.1.8- Development of husbandry farms	The Call seeks to contribute to increasing the competitiveness of livestock farms in a number of areas. It is possible to create and design buildings for animal husbandry, as well as for the handling and storage of the produced product, as well as to procure tools and machines related to animal husbandry. In addition, support will be provided for the renovation of the building energy and building engineering facilities of the livestock farms, the modernization of their technologies and the acquisition of technologies for the utilization of renewable energy. A further aim of the Call is to strengthen and develop the farms of young farmers and to increase employment.
477	VP-M04.1.2-Kisméretű terménytároló, szárító, tisztító	RDP-M04.1.2-Crop storage, cleaner, drier,	Improvement of the competitiveness of Hungarian agriculture with ensuring storage and drying capacities and resource efficiency of crops produced on the arable land . Ensuring technical standards for storage and development of long-term storage technologies of stored crops .
670	VP-M04.1.3-Kertészeti üzemek korszerűsítése	RDP-M04.1.3 Horticulture modernization - plants	The Call supports the improvement of energy efficiency in horticultural farms and the reduction of the environmental impact of the sector. The call will help to improve the energy efficiency of horticultural farms through modernizations, renovations and the use of renewable energy technologies. A further aim of the Call is to strengthen and develop the farms of young farmers and to increase employment.
402	VP-M04.1.3.1-Kertészet-üvegház	RDP-M04.1.3.1-Horticulture modernization - glass houses	The purpose of this call is to improve the competitiveness of the horticultural sector and the production of added value by promoting spreading of new, innovative and environmentally friendly horticultural technologies and cultivation methods. The operation also extends in the horticultural economy to improve the energy efficiency of the sector to reduce environmental effects. The operation for horticultural equipment helps to reduce the energy consumption by renovations of building energy, building engineering and energy supply; Horticultural farms are promoted by the use of renewable energy technologies, as well.
403	VP-M04.1.3.2-Kertészet - ültetvény	RDP-M04.1.3.2-Horticulture modernization - plantations	The purpose of this call is to improve the competitiveness of the horticultural sector and the production of added value by promoting spreading of new, innovative and environmentally friendly horticultural technologies and cultivation methods. The operation also extends in the horticultural economy to improve the energy efficiency of the sector to reduce environmental effects. The operation for horticultural equipment helps to reduce the energy consumption by renovations of building energy, building engineering and energy supply; Horticultural farms are promoted by the use of renewable energy technologies, as well.
401	VP-M04.1.3.3-Kertészet - gyógynövény	RDP-M04.1.3.3-Horticulture modernization - herbs	The aim of this call is to increase the competitiveness of the horticultural sectors and the production of added value by supporting the dissemination of new, innovative and environmentally friendly horticultural cultivation technologies and methods.

JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
400	VP-M04.1.3.4-Kertészet - gombaház-hűtőház	RDP-M04.1.3.4- Horticulture modernization - fungi houses and cold stores	The purpose of this call is to improve the competitiveness of the horticultural sector and the production of added value by promoting spreading of new, innovative and environmentally friendly horticultural technologies and cultivation methods. The operation also extends in the horticultural economy to improve the energy efficiency of the sector to reduce environmental effects. The operation for horticultural equipment helps to reduce the energy consumption by renovations of building energy, building engineering and energy supply; Horticultural farms are promoted by the use of renewable energy technologies, as well.
491	VP-M04.1.3.5-Kertészeti gépbeszerzés	RDP-M04.1.3.5- Horticulture modernization - machines	Purchase of new machines and equipment or their quality replacement to meet the increasing demand for high quality horticultural products and to increase the competitiveness of the horticulture sector
552	VP-M04.1.3.6-Borszőlőültetvény	RDP-M04.1.3.6-Vineyards	The aim of this call is to increase the competitiveness of the horticultural sector by supporting the establishment of new vineyards.
664	VP-M04.1.3.7-Csetmekertek gépbeszerzése	RDP-M04.1.3.7 Machines for seedling gardens	The primary objective of the call is to encourage the development of tools and machinery to improve the efficiency of the forest reproductive material production sector.
469	VP-M04.1.4-Vízgazdálkodás	RDP-M04.1.4- Water management	Support of water retention, sustainable management of our water resources, economical irrigation technologies, climatic-resistant production methods and sustainability land use, adaptation to climate changes. Maintenance or save of surface and groundwater bodies in good condition in quantitative terms for the safety of agricultural production and for the adaptation to climate change
535	VP-M04.1.5-Az agrár-innovációs operatív csoportok innovatív beruházásai	RDP-M04.1.5-European Innovation Partnership (EIP-Agri) operational groups - innovative technologies	The objective of the Agricultural Innovation Operational Groups is to implement projects aimed at improving the productivity and environmental efficiency of the agricultural economy, including agricultural production, food processing, viticulture, short supply chains, forestry, in particular resource efficiency and adaptation to climate change.
554	VP-M04.1.6-Energiatakarékosság javítása-mgi üzemek	RDP-M04.1.6-Improving the energy efficiency of the agricultural plants	Call of the Government of Hungary for farmers and non-agricultural micro and small enterprises to implement innovative and environmentally friendly developments to improve energy efficiency.
530	VP-M04.2.1-innovatív csoportok beruházása - élelmiszerfeldolgozás	RDP-M04.2.1-Investment of innovative groups - food processing	The objective of the Call is to implement projects aimed at improving the productivity and environmental efficiency of the food processing, in particular resource efficiency and adaptation to climate change.
399	VP-M04.2.1-Mezőgazdasági termékek érték növelése	RDP-M04.2.1-Increasing added value of the agricultural products	The purpose of the Call is to provide opportunity for the agricultural producers as well as for non-agricultural-producer micro and small businesses, to make improvements which help them to carry out their activities economically, and to help them to maintain their own and their employees' employment. The further objective of the Call is improving competitiveness of the industry actors by implementing state-of-the-art, innovative technologies. Strange emphasis is placed on the production of higher quality products that meet specific needs as well as on investments in resource efficiency.
566	VP-M04.2.1-Mgi termékek érték növelése-Élelmiszer-feldolgozó üzemek	RDP-M04.2.1- Adding value to agricultural products - Food processing plants	The purpose of the Call is to provide an opportunity for farmers to implement developments that will help them to continue their activities economically and to keep their own and their employees' employment. A further aim of the Call is to improve the competitiveness of industry actors by implementing state-of-the-art, innovative technologies. Particular emphasis will be placed on investing in higher quality, special needs products and resource efficiency.
478	VP-M04.2.2-Borászat	RDP-M04.2.2-Winery	The aim of the Call is to provide winemaking machines, technology for farmer and for non-farmer wineries of not bigger than micro or small-size wineries. The purpose of the investment is to increase the efficiency of energy and of other resource use or usage of renewable energy sources.
529	VP-M04.2.2-Innovatív csoportok beruházása - borászat	RDP-M04.2.2-Investment of innovative groups - wineries	The objective of the Call is to implement projects aimed at improving the productivity and environmental efficiency of the viticulture, in particular resource efficiency and adaptation to climate change.
567	VP-M04.2.2-Mgi termékek érték növelése-Borászati üzemek	RDP-M04.2.2- Adding value to agricultural products - wineries	The Government's goal of the Call is to encourage innovation in the food industry sector, thereby to develop outdated technological methods and to create new jobs along these measures. The Government plans to achieve this goal by cooperating with farmers and micro and small enterprises that do not qualify as farmers, in accordance with the conditions set out in this Call.
555	VP-M04.2.3-Energiatakarékosság javítása-feldolgozó üzemek	RDP-M04.2.3- Improving the efficiency of energy - Processing plant	Call of the Government for farmers and non-agricultural micro and small enterprises to implement innovative and environmentally friendly developments to improve energy efficiency.
472	VP-M04.4.1-NTB Élőhelyfejlesztés	RDP-M04.4.1 - Non - productive agricultural investment - Habitat development	The aim of the measure is to preserve and improve the nature conservation status of species and habitats, especially around the agriculture areas.
492	VP-M05.1.1.1-Időjárási kockázatok megelőzése	RDP-M05.1.1.1-Prevention of weather risks	The aim of the measure is to prevent damages to disasters and adverse climatic events
415	VP-M06 Fialat gazda (ÚMVP)	RDP - M06 Young farmer (NHRDP)	This measure objectives are to facilitate young farmers' initial establishment and the structural adjustment of their holdings after initial setting up to promote the transformation of the holding structure and the improvement of age structure of the agricultural labour force.
437	VP-M06 Turisztika (ÚMVP)	RDP - M06 Promotion of tourism (NHRDP)	The purpose of the Call is to support sustainable rural and agro-tourism developments, investments and service conditions in order to create or maintain jobs.
501	VP-M06.1.1-Fiatal Mezőgazdasági termelők támogatása	RDP-M06.1.1-Setting up young farmers	This measure objectives are to facilitate young farmers' initial establishment and the structural adjustment of their holdings after initial setting up to promote the transformation of the holding structure and the improvement of age structure of the agricultural labour force.
406	VP-M06.3.1-Mezőgazdasági kisüzemek fejlesztése	VP-2-6.3.1-16 Development of Small Farms	The support intends to facilitate the implementation of at least the following objectives: stabilisation and development of the market position of the existing product structures, modernisation and diversification of the product structure based on market requirements, modernisation of the mode of operation, increasing environmental efficiency, production of higher added value products, earning an income and increasing employment.
676	VP-M06.3.1-Mezőgazdasági kisüzemek támogatása (2020)	RDP - 6.3.1-20 Aid of Small Farms	The support intends to facilitate the implementation of at least the following objectives: stabilisation and development of the market position of the existing product structures, modernisation and diversification of the product structure based on market requirements, modernisation of the mode of operation, increasing environmental efficiency, production of higher added value products, earning an income and increasing employment.
500	VP-M06.4.1-Nem mezőgazdasági tevékenységek fejlesztése	RDP-M06.4.1-Diversification into non-agricultural activities	The purpose of this call is to support micro-enterprises in rural areas to develop their start-up or existing non-agricultural activities.

JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
514	VP-M07.2.1-Helyi piacok fejlesztése	RDP-M07.2.1-Development of local markets	The aim of the call is to improve the quality of life of people living in rural areas, to provide the population with healthy, high-quality food, to facilitate market access for local producers, to support the use of local raw materials and, through this, to develop the local economy.
495	VP-M07.2.1-Külsőterületi helyi közutak fejlesztése	RDP-M07.2.1-Development of local public roads in periphery	Developing rural local roads in rural areas, power and work equipment necessary for the management, improvement and maintenance of municipal roads
560	VP-M07.2.1-Településkép fejlesztése	RDP-M07.2.1- Development of village scape	The aim of the call is to improve the quality of life of people living in rural areas, to make rural settlements more attractive, through improvements to sustainability and social inclusion and lifelong learning, with real community-based functions and uses tailored to local needs. Increase energy and resource efficiency and improve access to basic services and community living conditions through the creation and development of community spaces.
668	VP-M07.2.1.1-Helyi piacok infrastrukturális- és eszköz fejlesztése (2020)	RDP-M07.2.1.1-Infrastructure and asset development of local markets (2020)	The primary objective of the call is to alleviate the economic impact of the coronavirus by developing the local economy by providing healthy, high-quality food to people living in rural areas, facilitating market access for local producers and supporting the use of local raw materials. The implementation of small-scale infrastructure and asset investments will ensure the continuous connection of local producers and the population.
405	VP-M07.2.1.2-Szennyvízkezelés	RDP-6-7.2.1.2-16 Wastewater treatment	The overall objective of the measure is to develop the small-scale construction of infrastructure assets in rural settlements
506	VP-M07.2.1.4-Tanyák infrastruktúrafejlesztései	RDP-M07.2.1.4-Village infrastructure development	The aim of the call is to improve the infrastructural backwardness of homesteads, where electricity, water supply or wastewater treatment is outdated or not properly constructed.
407	VP-M07.4.1.1-Településkép, közösségi tér fejlesztése	RDP-6-7.2.1-7.4.1.1-16 Development and preservation of the physical condition and image of villages and multifunctional community spaces	The aim of the Call is to improve the quality of life of people living in rural areas, to make rural settlements more attractive through developments that promote sustainability and social inclusion and lifelong learning, with real community-based functions and uses adapted to local needs. A key objective is to increase energy and resource efficiency and to improve access to basic services and community living conditions through the creation and development of community spaces.
496	VP-M07.4.1.2-Önkormányzati utak karbantartásához szükséges erő- és munkagépek beszerzése	RDP-M07.4.1.2-Power and work machines for municipal road maintenance	Developing rural local roads in rural areas, power and work equipment necessary for the management, improvement and maintenance of municipal roads
515	VP-M07.4.1.3-Helyi közétkeztetés fejlesztése	RDP-M07.4.1.3-Development of local catering	Development of markets, infrastructure of market places and development of public catering for local product sales in rural areas
418	VP-M08 Erdei közjóléti létesítmények (ÚMVP)	RDP - M08 Forest public welfare facilities (NHRDP)	Non-refundable, 100 % intense support can be claimed for the development of excursion places, resting stops, educational paths and viewpoints in the forest in favour of the implementation of public welfare purposes
433	VP-M08 Mgte támogatás (NVT)	M08 Improving forest areas and the viability of forests / Afforestation of agricultural land	The purpose of this measure is to promote agricultural restructuring, enhance the country's forest cover, maintain the rural areas of natural and landscape heritage, improve the living conditions of the rural population, and develop the defensive, economic, social and social welfare functions of forests.
422	VP-M08 Mgte támogatás (ÚMVP)	M08 Improving forest areas and the viability of forests / Afforestation of agricultural land	The purpose of this measure is to promote agricultural restructuring, enhance the country's forest cover, maintain the rural areas of natural and landscape heritage, improve the living conditions of the rural population, and develop the defensive, economic, social and social welfare functions of forests.
454	VP-M08.1.1-Erdősítés	VP-M08.1.1 Support for afforestation	A) target area:traditional afforestation. Forests created through traditional afforestation will later become properties under forestry utilisation, in whose case, after the first final felling, pursuant to Act XXXVII of 2009 on Forests, Protection of Forests and Forestry, forest holders must renew their forest from their own resources and also continue to manage it in the long term future pursuant to the rules concerning sustainable forest management. B) target area: for the creation of plantations of fast-growing tree species for the purpose of producing industrial raw material. In the case of a plantation for industrial purposes, the created wood community will not be a forest, is not required to be registered as an area under forestry utilisation and, following the first felling of the wood community, it may be used again for agricultural activities. For the establishment of these plantations, the forest authority will make special efforts to ensure that high quality wood raw material is produced only in truly appropriate areas. This means that farmers diversify their activities while at the same time, instead of using the land as cropland, they carry out a less intensive form of land utilisation.
512	VP-M08.3.1-Erdőtűz-megelőzés	RDP-M08.3.1 Prevention of damage to forests caused in forestry potential	C/ target area: Biological or chemical protection against forest pests. B/ target area: Establishment and development of monitoring facilities and communication equipment in connection with forest fires, pest-induced infections and diseases A/ target area: Forest fires can be prevented most efficiently by installing the following infrastructural facilities and implementing the following activities.
440	VP-M08.4.1-Erdészeti potenciál helyreállítása	VP-5-8.4.1-16 Restoring forest damage in forestry potential	The main purpose is to provide support for restoring forestry potential and to prevent secondary forest damage in areas affected by natural disaster. The nature of the support is normative, non-refundable, and it consist of basic recovery support and additional support.
505	VP-M08.5.1-Erdőszerkezet-átalakítás	RDP-M08.5.1 Support for investments improving the resilience and environmental value of forest ecosystems	A/ The main aim of total forest restructuring When restructuring forests by underplanting. There is now a demand for forest renewal with climate resistant tree species. B/ Other interventions to increase the resistance and environmental value of forest ecosystems (one-off payments): • controlling the invasive alien tree and shrub species • establishing or restoring clearings in forests
524	VP-M08.6.1-Erdőgép	RDP-M08.6.1-Forest machines	Improve the efficiency of forest management and natur management, develop of tools and machinery including local renewable energy system and machinery for the preparation of wood processing.

JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
446	VP-M08.6.2-Erdei termelési potenciál mobilizálása	RDP-M08.6.2 Activities serving the mobilisation of the forestry production potential	Increasing the economic value of forests by silvicultural interventions which result in forests having higher economic value. These include interventions the effects of which may not be immediately experienced but in the future during timber utilization. The following are the eligible activities: • care of young forests • cleaning • trunk production intervention
517	VP-M09.1.1-Termelői csoportok	RDP-M09.1.1- Producer groups	The support is designed to facilitate the followings: the adaptation of production and performance of members of producer groups to market requirements; the joint distribution of goods - market preparation is included; the centralization of sale and the supply of bulk buyers; and the establishment of common rules for production, harvest and contact information.
629	VP-M09.1.1-Termelői csoportok - 2020	RDP-M09.1.1- Producer groups - 2020	
417	VP-M10 AKG (ÚMVP)	10.1.1 Agri-environment scheme	The purpose of the measure is the preservation and improvement of the physical (soil, water, air) and natural environment affected by agriculture, and the conservation of genetic resources. So is the promotion of raising the quality of products, the enhancement of food security and the support of farmers' income security. The support is available for arable crops, grassland management, plantation management and wetland management group scheme.
427	VP-M10 Génmegőrzés-állat (ÚMVP)	10.2.1.2 Ex situ or in vitro preservation of native and endangered farm animals? genetic resources and advisory activities preventing genetic constriction	The aim of the measure is to support the preserving of protected and endangered indigenous animal species in breeding in ex situ target program, and to compensate the loss of income. Through in vitro target program the goal is to impel the preservation of the genetical stock by supporting the storage of propagation materials. The aim of the information and knowledge-enhancement target program is to support the familiarization of indigenous species in a wider range and to support the popularization of products produced from the species. In the target program named: organisational activities relating to livestock breeding the goal is to ensure the proper professional background (breeding leader, regional breeder) by the breeding organizations.
431	VP-M10 Óshonos állatfajták támogatás (ÚMVP)	10.2.1.1 In situ preservation of native and endangered farm animals? genetic resources	The aim of the support is to support the preserving of protected and endangered indigenous animal species in breeding and to compensate the loss of income.
383	VP-M10.1.1-Agrár-környezetgazdálkodás	10.1.1 Agri-environment scheme	The purpose of the measure is the preservation and improvement of the physical (soil, water, air) and natural environment affected by agriculture, and the conservation of genetic resources. So is the promotion of raising the quality of products, the enhancement of food security and the support of farmers' income security. The support is available for arable crops, grassland management, plantation management and wetland management group scheme.
394	VP-M10.2.1-Óshonos állatok-in situ	RDP-M10.2.1-In situ preservation of native and endangered farm animals? genetic resources	The aim of the support is to support the preserving of protected and endangered indigenous animal species in breeding and to compensate the loss of income.
527	VP-M10.2.1.2-Óshonos állatok-ex situ/in vitro és tanácsadói tevékenység	RDP-M10.2.1.2-Ex situ preservation of native and endangered farm animals? genetic resources	The aim of the measure is to support the preserving of protected and endangered indigenous animal species in breeding in ex situ target program, and to compensate the loss of income. Through in vitro target program the goal is to impel the preservation of the genetical stock by supporting the storage of propagation materials. The aim of the information and knowledge-enhancement target program is to support the familiarization of indigenous species in a wider range and to support the popularization of products produced from the species. In the target program named: organisational activities relating to livestock breeding the goal is to ensure the proper professional background (breeding leader, regional breeder) by the breeding organizations.
404	VP-M10.2.2-Növényi génmegőrzés	Conservation of plant genetic resources	The objective of the measure is to prevent gene erosion, to mitigate the negative effects of genetic vulnerability as well as to supply plant breeding, cultivation, ecological farming, agricultural and biological education with genetic resources and to explore and preserve genetic materials for future sustainable use.
388	VP-M11.1.1-Ökológiai áttérés	11.1.1 - 11.2.1 Convert to organic farming, maintain organic farming	The purpose of the measure is to maintain and increase biodiversity in order to protect the environment, protect the health of producers and consumers and strengthen natural self-regulation processes. Furthermore to protect and improve of the biological state of the soil, to reduce the adverse environmental impacts resulting from the misuse of pesticides and the improper nutrient management and the guarantee of food safety
389	VP-M11.2.1-Ökológiai fenntartás	11.1.1 - 11.2.1 Convert to organic farming, maintain organic farming	
423	VP-M12 Natura 2000 (ÚMVP)	12.1.1 Compensatory payments for Natura 2000 agricultural areas	The main objective of the measure is to preserve and sustain, by way of up keeping environmentally sound land use methods, the favourable conservation situation of the indicative species and selected habitats listed in the respective EU legislation; ensuring the settings for the natural condition and for a management of creating and sustaining such a condition, protection of the species and of habitats in the indicated areas (with particular regard to grasslands with high levels of biodiversity), as well as the enforcement of compliance with the rules of land use, in line with the provisions.
466	VP-M12.1.1-Natura gyep	Natura 2000 payments - grassland (Natura 2000 grassland support)	The main objective of the measure is to preserve and sustain, by way of up keeping environmentally sound land use methods, the favourable conservation situation of the indicative species and selected habitats listed in the respective EU legislation; ensuring the settings for the natural condition and for a management of creating and sustaining such a condition, protection of the species and of habitats in the indicated areas (with particular regard to grasslands with high levels of biodiversity), as well as the enforcement of compliance with the rules of land use, in line with the provisions.
434	VP-M12.2.1-Natura2000 erdő	RDP - M12 Natura 2000 Forest (NHRDP)	The aim of the support is to compensate those farmers who have loss of income because of the implementation of legislation enforcing the Natura 2000 guidelines and costs arising from parts of forests registered in National Forest Database.

JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
421	VP-M13 Kedvezőtlen adottságú területek (ÚMVP)	13.2.1 Compensation payments to areas facing natural constraints	The aim of the measure is to provide partial compensation – subject to the fulfilment of specific conditions – of economic, social and natural factors having unfavourable impact on the efficiency of production, thereby to sustain production in areas designated as less favoured areas and to stop the increasing migration there from.
465	VP-M13.2.1-THÉT	Payments to areas facing natural or other specific constraints	The aim of the measure is to provide partial compensation – subject to the fulfilment of specific conditions – of economic, social and natural factors having unfavourable impact on the efficiency of production, thereby to sustain production in areas designated as less favoured areas and to stop the increasing migration there from.
426	VP-M14 Tejágazat állatjólét (ÚMVP)	14.1.1 Animal welfare aid in the milk sector following restructures	Animal welfare support for accompanying the restructuring of milk sector. It can be claimed by dairy cow farmers, who complying with the criteria fixed in the referring regulation can receive payment yearly.
456	VP-M14.1.1-Tejágazat-állatjólét	RDP-M14.1.1- Animal welfare in the milk sector	Animal welfare support for accompanying the restructuring of milk sector. It can be claimed by dairy cow farmers, who complying with the criteria fixed in the referring regulation can receive payment yearly.
621	VP-M14.1.1-Tejágazat-állatjólét - kiskérődző	RDP-M14.1.1- Animal welfare in the milk sector - ovine and caprine	Animal welfare support for accompanying the restructuring of milk sector in ovine and caprine. It can be claimed by dairy sheep or goat farmers, who complying with the criteria fixed in the referring regulation can receive payment yearly.
429	VP-M15 Erdő-környezetvédelem (ÚMVP)	15.1.1 Forestry-environment payments	The purpose of the measure is the preservation and extension of the current breeding range of indigenous tree species by removing spontaneous and aggressively expanding, non-indigenous tree and shrub species. This measure consists of the following schemes: Reduction of the aggressively expanding, non-indigenous tree and shrub species scheme Selection forest management scheme Labour-intensive nurturing of forests scheme Reduction of clear felling restoration of indigenous forests scheme Ensure opportunities for provision of special forest habitats and natural forest regeneration scheme Postponement of final use for the purpose of soil and habitat protection scheme Maintenance of forests for public welfare scheme Development and maintenance of forest clearings scheme Use of environmental friendly handling methods scheme
503	VP-M15.1.1-Erdő-környezetvédelmi kifizetések	RDP- M15.1.1. Forest-environmental and climate services and forest conservation	As part of its activities relating to forest management, the forestry authority uses forest plans to determine the obligations and rights forest holders have in respect of forest utilisations and silvicultural interventions. Forest-environmental payments are granted to eligible beneficiaries who, relying on their entitlements, make voluntary forest-environmental commitments over and above those required in the relevant legislation and in forest management plans. Forest environment target areas: A) Forest-environmental commitments Support of selection forest management. Postponement of final harvest for the sake of soil and habitat protection. Reserving tree groups after final harvest. Supporting the labour-intensive care of forest cultures. Nature sensitive handling/transportation. Reserving deadwood in forests.
489	VP-M15.2.1.1-Erdészeti génmegőrzés	VP-M15.2.1 Support for the conservation of forest genetic resources	In situ gene conservation methods: establishing and maintaining forestry gene reserves or stocks selected as seed-orchards. Ex situ gene conservation methods: maintaining forestry gene collections. Creating and maintaining central parent plantations (both ex situ and in situ).
520	VP-M15.2.1.2-Erdészeti génmegőrzés fejlesztése	VP-M15.2.1.2 Improvement of forest genetic resources	The aim of the tender is to achieve the improvement of forest genetic resources, for forestry companies and other public organizations. This measure consists of the following schemes: In situ methods for the conservation of forest genetic resources: - establishment of forest gene reserves - establishment of breeding stock assigned for seed cultivation Ex situ methods for the conservation of forest genetic resources: - in juvenile form, creating genotype - in graft form, creating genotype - creating offspring, descent and family in tree form - creating a genotype in tree form Stock nursery for forestry timber production: - creating vegetative propagation species, varieties, super-elite and elite-grade parent farms - creating vegetative propagation species, varieties, elite-grade parent farms - creating seed-growing plantations of generative propagation species and varieties.
534	VP-M16.1.1-innovációs operatív csoportok létrehozása	European Innovation Partnership (EIP-Agri) operational groups - creating innovation operational groups	The objective of the Agricultural Innovation Operational Groups is to implement projects aimed at improving the productivity and environmental efficiency of the agricultural economy, including agricultural production, food processing, viticulture, short supply chains, forestry, in particular resource efficiency and adaptation to climate change.

JOGCÍMKÓD	JOGCÍM	Angol név	Leírás
570	VP-M16.4.1-REL és helyi piacok - FH	RDP-M16.4.1 Short Supply Chains and Local Markets	The aim of the call is to create and develop short supply chains and local direct sales opportunities through horizontal and vertical cooperation between supply chain actors and to increase farmers' incomes by promoting their activities through the promotion and joint project planning. The task of long-term and structured producer collaborations is to develop collaborations and own business models based on a multi-year project plan, creating individual and common sales forms.
523	VP-M16.4.1-REL és helyi piacok - MC	RDP-M16.4.1 Short Supply Chains and Local Markets	The aim of the call is to create and develop short supply chains and local direct sales opportunities through horizontal and vertical cooperation between supply chain actors and to increase farmers' incomes by promoting their activities through the promotion and joint project planning. The task of long-term and structured producer collaborations is to develop collaborations and own business models based on a multi-year project plan, creating individual and common sales forms.
463	VP-M17.1.1-Biztosítási díjtámogatás	VP-3-17.1.1-16 Contribution to insurance premium	The purpose of the measure is to reduce economic losses caused by adverse climatic events, increase the proportion of agricultural land and the range of plants to be insured and the variety of risks to be insured against, furthermore to contribute to a more stabilized farming. The support is granted for loss caused by an adverse climatic event, which destroys more than 20% of the average annual production of the farmer. The financial contribution per farmer is max. 70% of the insurance premium and is paid directly to the farmer. The beneficiaries are those insured farmers/agricultural companies, who submitted a single application and have „A”, „B” or „C” type of insurance contract for arable plants, fruits or vegetables that have been declared in their single application for the application year concerned.
445	VP-M19 Versenyképesség (ÜMVP)	RDP - M19 Competitiveness (NHRDP)	The measure foresees the promotion of sustainable and competitive novel local procedures for strengthening the potential of agriculture, forest management, food industry and the rural economy.
550	VP-M19.2.1 - Helyi Fejlesztési Stratégiák megvalósítása	RDP-M19.2.1 - Implementation of LDSs strategies	Under this measure, the LEADER LAGs developed Local Development Strategies in line with the objectives of the Rural Development Program and other operational programs and in line with local development objectives. In the Local Development Strategy approved by the Managing Authority, the LEADER LAGs defined development goals, which are determined by calls for proposals, the so-called LEADER is implemented by regional actors in the framework of local calls.
518	VP-M19.3.1-LEADER Együttműködés - FH	RDP-M19.3.1-LEADER cooperation	The aim of the call is to encourage new solutions to the problems of rural areas, as well as to develop the network of local actors outside the areas and to acquire the competencies needed to modernize rural development. In LEADER co-operations, the promotion and implementation of cross-border co-operations between rural areas inhabited by Hungarians and areas in Hungary, special knowledge, experience and the sharing of knowledge about good practices are of particular importance. Another goal is to encourage the development of various joint actions, initiatives to stimulate community life, joint organizations, thereby strengthening innovation, local capacity and local development processes.
